Bitu-Ox 400™ is a safe and effective product that could be used at asphalt plants, paving companies, roofing companies, DOT and more. *Bitu-Ox 400™* immediately breaks down any tar covered surface and turns it into a liquid form for easy clean up. This formula not only works effectively but is certified biodegradable and waterway safe* by SCS Global Services located in California.

Bitu-Ox 400™ is formulated to work in extreme heat and cold, with a flash point of 400°F. It is the safest alternative to diesel fuel at asphalt plants. Whether used as a release agent or tool cleaner it can be used on any job from large to small. Its' effectiveness makes *Bitu-Ox 400™* an easy return on investment. It will prolong the life of the equipment, shorten man hours when it comes to cleaning and create a safer work environment.

Bitu-Ox 400™ OVERVIEW

An oil based solvent that liquefies and breaks down tar, asphalt, oil, grease, asphaltene and paraffins. Has multiple uses including acts as a heavy lubricant, release agent and degreaser. For use on multiple surfaces in any industry including asphalt, department of transportation and auto and truck.

Other Uses/Characteristics:

- ✓ Can replace all conventional solvents
- ✓ Slow evaporating
- ✓ Excellent penetrating characteristics
- ✓ Leaves rust prevention film
- ✓ Heavy oil degreasing
- ✓ Bitumen railway tanks
- ✓ Painting equipment
- ✓ Tools clean up
- ✓ Roofing adhesive removal
- ✓ Pipe coatings, storm water drain coatings
- ✓ Clean pot hole filling tools and machines

Can Replace: WD40, Diesel Fuel and Karnak Karna-Klean

No odor. Flash Point 400°F.

Available in 32 oz. bottles, 5 gallon pails and 55 gallon drums.

*SCS Certified Biodegradable & Waterway Safe**

Non-Reactive

Non-Carcinogenic
